

Apples-to-Apples Grinder Comparison

JWC Custom Solutions

Wastewater debris varies, so your cutter stack should, too. JWC Muffin Monsters feature:

- Customized cutter stacks for your specific needs.
- Ability to mix & match cutters in a single stack to process your specific waste stream.
- Extremely tight machine tolerance on cutters and spacers which minimizes open gaps and solids bypass.

JWC Service

Save time and money by renewing your unit with a full cutter cartridge.

- Simply replace the worn cutter cartridge with a JWC factory-built Renew cartridge, that includes a full warranty.
- Minimize downtime with cartridges that don't have to be removed until the Renew unit (ships as fast as one week) arrives.

JWC Is The Market Leader

JWC is the market leader with over 45 years in the business and more than 40,000 deliveries of the Muffin Monster. JWC grinders set the gold standard for quality.

The Other Guys

Non-customizable monolithic cutter stacks don't address varying needs and require looser machining tolerances which means more open gaps and a higher chance of solids bypass.

The Other Guys

Repairs are not covered by a warranty and increase downtime and manpower as you must:

- Clean the repair unit before service
- Disassemble the repair unit
- Identify replacement parts
- Wait for replacement parts (up to 16 weeks for replacement monolithic cutter stack)
- Reassemble the unit

The Other Guys

There's a reason the name Muffin Monster is synonymous with dual-shafted grinders.

**When you compare grinders,
the choice is clear.**
